

Quick start

Thank you for your purchase. Here is how to get going in five minutes.

1. OPEN THE FILE

Microsoft Excel (Windows or Mac)

Double-click the .xlsx file. If you see a yellow 'Protected View' or 'Enable Editing' bar, click Enable Editing.

Google Sheets (free)

Go to drive.google.com, click New > File upload and pick the .xlsx file. Then right-click it > Open with > Google Sheets. In Sheets, use File > Save as Google Sheets so you edit a Google copy.

Apple Numbers / LibreOffice

The file opens in both, but it was designed for Excel and Google Sheets, so some colours or charts may look different.

Phone or tablet

Works in the Excel and Google Sheets apps, but a computer is much easier for setting it up.

2. WHAT EACH TAB DOES

Start Here

The same steps as this guide, inside the file.

My Debts

Type up to 10 debts, your start month and extra payment, and pick your method.

Compare

Debt-free date, months, total interest and interest saved for snowball, avalanche and minimums only. Payoff order for each.

Snowball / Avalanche / Minimum Only

Month-by-month schedules for up to 25 years.

Progress Log

Write down what you really owe each month and see your progress as a percentage paid off.

Good to know

- Type APR as a plain number: 22.99 means 22.99%.
- Snowball pays the smallest balance first. Avalanche pays the highest APR first.
- Interest is estimated monthly ($\text{balance} \times \text{APR} / 12$). Lenders often charge daily, so their figures will differ a little.
- This is a planning tool, not financial advice. Check payoff amounts with your lender.

SOMETHING NOT WORKING?

Re-download the original file any time from Etsy: You > Purchases > Download files. Still stuck? Send us a message through Etsy and we will help.
