How to use this planner

Moving has hundreds of small jobs. This planner breaks them into weeks so nothing important slips. Print it and keep it in a clear folder, or write on it in any note-taking app that lets you mark up a PDF.

1. Fill in the overview

Write your moving date on the Move overview page, then count back to find your 8-week start.

2. Work the countdown

Tick tasks week by week. Skip what does not apply. Add your own in the blank lines.

3. Compare before you book

Use the quote comparison page to line up movers or truck rentals side by side.

4. Number every box

Give each box a number and log it. You will know exactly what is in box 23 without opening it.

5. After the move

Use the walkthrough and change-of-address pages in your first two weeks.
